

Purpose, user requirements and Audience

The purpose of this website is to help make decisions and to give information about mobile phone products, mobile phone services and mobile phone accessories that are available for purchase.

Target the website at anyone who is interested in buying mobile phones or related products. Need it to load easily and be quick and easy to navigate through. Contains at minimum 8 interlinked pages so that it is a functioning website. It needs to contain at least 1 table to display tabulated data. Has to have a consistent use of text, colour schemes and page styles in all of the web pages so that the website looks professional. It is required to contain some interactive features, e.g. a feedback form to collect customer enquiries. Needs to have at the least two external hyperlinks to other web pages related to this one. Everything has to be internally linked, with easily navigable menus. It must contain a link to an online forum or social media

link colour: #f7de20

The background colour will fade from deep blue at the top to light orange at the bottom of the page (sort of poorly displayed by the colour of the boxes).

I will use a template to keep the design of the website consistent and the background image will be placed on all pages as to keep the colour scheme throughout the site.

Alternative solutions for this page

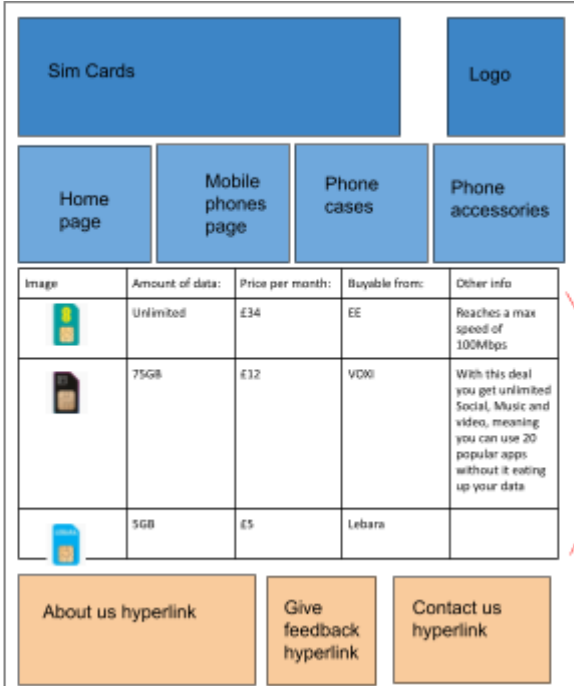

Rather than have the bar at the top of the screen, maybe have the bar at the side of the screen, also i could also change the colour scheme from blue and orange to a more simple white black and green, to make it look more sleek and modern, ontop of that, perhaps rather than a title and logo having a banner instead

	AO Mobiles Direct- https://www.mobilephonesdirect.co.uk/	I quite like the bar of options here, especially the colour scheme which gives the site a hacker sort of look (as green on black is sometimes related with hacking code in media), i would like to use a similar bar option in my website to help the users transverse my website
	Mobiles.co.uk- https://www.mobiles.co.uk/contactus	I like the idea of there being another option as to also call for assistance or to inquire about something rather than just an email, as sometimes this can result in getting answers quicker than an email, i hope to use this idea in the Contact us page
